The target (see sketch map) has had at least four major periods or eras of utilization over the years: prehistoric, colonial, early 20th century, & modern. It's past (& legitimate modern) use was associated w/ fishing or hunting i.e. whaling. There are numerous rusted and abandoned metal objects as well as collapsed structures; a dilapidated settlement. There are piles of refuse & discarded objects. There is some sort of iron conveyor mechanism w/ a series of braces & cross members - maybe rollers. There is a pile of large metallic bucket-like objects. There are pockets of modern or recent evidence of visits by fishing or hunting parties. Used as a stop-over by marine life fishermen or whalers. It was also once used by a military organization for maneuvers or as an observation post. There is a turned over metal "wagon" or transport vehicle lying on its side. Overall appearance of abandonment & neglect. There is a small, but maintained, hard packed runway. It is used for stop-overs and this place has the feel of heavy duty narco involvement. A significant hub of trafficking activity.

There is an aircraft stop-over. There is a "determent" association (?) with this activity.

E. SESSION SUMMARY: (see additions to sketch map from session one.)

Plans are in place to establish a series of these "stop overs".
Smaller craft (boats & planes) able to "lay low" for periods of time.
Overall sense that current activity is utilizing, either previous
in-place military assets i.e. bunkers, look-outs, etc or previous/
current military personnel.

There is a sense of continued preparation, however
utilization is already in place. This facility is used as a
~~transfer~~ transfer point for smuggling activities. Seen as a
"proto type" for operation. Concept of frequent transfers of
small amounts i.e. twin engine quantities vs. freighter amounts.

Twin engine aircraft come to island. Link up with small boats.
Cargo transferred from planes to boats, but this doesn't make sense.
Boats are able to loiter around area; aircraft are in & out
quickly. Aircraft arrive in pairs; some arrive back-to-back.

Small camp hidden w/i tree line near end of runway.
Used by individuals functioning as "spotters", "contactors" or "watchers".

Bunkers & hangars present. Fuel brought to island via
"Shrimpers". There are wooden rails in which objects are rolled
along them. There are piles of fuel, etc. within structures.
bunkers within structures.

Approved For Release 2000/08/10 : CIA-RDP96-00791R000100310001-3
Operation is taking advantage of the poor utilization
of this island.

Concept of "facades" in place: maintaining appearance of
apparent inconsistent or occasional use by "locals".

Some structures are partially buried into dunes / terrain.
One is large enough for a small plane to be stored (about 1/2
of a plane). Perceive cargo nets or some other "cover" covering
portion of craft that extends out of the structure. (see diagram pg 4.)

Operation has been utilizing older, run down structures as well.
Island "feels" private but comes under jurisdiction of a nearby
country. Some personnel have military connections; either
past or current with nearby country. One individual has an
historical connection with the island; has been there before
in a job related capacity. ^{also} BAR..., BARCA..., CECIL.

Pfhoretics: Quince, CARLOS, Juan, De Vaca (enterprises).
De Vaca feels like a family owned / run ~~corp~~ company.

Full moon is important to activity; transfer of cargo.
Again, plans are to make this a major link in network.
Use of "hi-tech" equipment.

Concept of a "set-up" team in place waiting for arrivals.
This "team" leaves, then comes back. There are fairly constant
"check-ups" on island.

The activity is receiving help from an outside organization
or company. (A/s of government person).

Name of this operation / network is associated with FIVE;
either something FIVE or FIVE something.

There is equipment hidden up in the trees of the higher terrain.
"Emphasis" of this equipment is towards the north & the east.

Again, great deal of emphasis in developing this

network system and the concept of "leaf plugging".

- E. Cargo (sometimes?) transferred from aircraft to boats.
- F. Fishing nets are around; barrels are in structures.
- G. ~~Excludes the concept~~ Use of high-tech equipment appears probable.
- H. Fairly constant check-up conducted on island.
- I. ^{some} Equipment appeared hidden in trees located in higher terrain.

IV COMMENTS:

- Detailed follow-ups to initial "hits" often pyramid into an impressive series of details that appear ^{to be} totally plausible; however, in such cases, accuracy may be found wanting.

[Describe activity in 

- Wooden rails; objects rolled along them.
- Piles of fishing, net-like material & barrels w/ structures.

Again, utilizing past historical use of island for activity.

Concept of facades in place.

[FACADE - what kind?]

Activity

Apparent inconsistent or occasional usage by "locals".

Some structures partially buried into dunes or terrain.

One is large enough for a small plane to be stored about 1/2.

See cargo nets or some other "cover" covering portion of craft that extends out from the structure.
